Re: NPDES Discharge for Stormwater Construction Activities
Ridgecrest Subdivision
No. PAI011504026-R
East Fallowfield Township
Chester County

Dear Mr. Moser:

Enclosed is the above-referenced permit which authorizes the discharge of stormwater from the construction activity described in the final erosion and sedimentation control plan and the permit application. Please contact the Chester County Conservation District to make arrangements to obtain your copy of the approved final erosion and sedimentation control plan. The plan must be fully implemented and available at the construction site. A preconstruction meeting must be scheduled with the District. Failure to do so may result in suspension of your permit.

Please read carefully Parts A, B, and C of the permit which detail the terms and conditions of this authorization. Conservation district's staff and/or representatives of the Department of Environmental Protection may inspect this earthmoving activity to determine compliance with applicable permit requirements, Chapters 92, 101, and 102 Rules and Regulations and the Clean Streams Law.

Permit requirements and federal regulations at 40 CFR Section 122.21(b) require "when a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit." Please be advised that once a contractor has been selected for the project, the permit must either be transferred to the contractor or the contractor must be made a co-permittee. The enclosed form must be used to add a co-permittee.

Enclosed is a Notice of Termination form to complete and file when construction activities have ceased and final stabilization has been achieved.

This authorization does not relieve the applicant from applying for and obtaining any and all additional permits or approvals from local, state, or federal agencies for the construction activity.
