Customers Get Smart About lighting... And Save!

Local municipal, institutional and non-profit customers are already saving thousands with PECO Smart Equipment Incentives.

Specifically, last month Warminster Township received nearly \$1,500 in rebates from PECO for upgrading their exterior lighting to qualified energy-efficient technology. Also in April, Upper Merion Area School District received more than \$6,000 in rebates for energy efficient improvements to the interior lighting at their Middle School, High School and Administration Building.

As a governmental, institutional or non-profit customer, PECO has energy-efficient solutions specifically designed to serve your unique needs. In addition to qualifying for equipment incentives for street and traffic lighting, you also can take advantage of our technical assistance program and comprehensive energy audits to help you get started. Incentives from PECO could cover 50 percent of the cost of the audit—up to \$10,000

when changes are implemented.

Part of PECO Smart Ideas—the company's full suite of energy efficiency and demand response programs for homes, businesses, and government, institutional and non-profit customers—PECO Smart Equipment Incentives provide financial incentives for installing or upgrading to more energy-efficient equipment and processes.

Incentives are available for lighting, heating and cooling, motors and drives, refrigeration and food service. In addition to the equipment incentives, financial incentives are also available for upgrading street lighting and traffic signals. Upgrading traffic signals to

LEDs and replacing incandescent street lamp fixtures with metal halide or high pressure sodium are just some examples.

To learn more, visit www.peco.com/SmartIdeas or call 1-888-5-PECO-SAVE (1-888-573-2672).

Seminars to Help Customers Learn More About Shopping for Electricity

At PECO, we are committed to being a trusted resource to help you prepare for the changes coming on January 1, 2011. As part of our ongoing outreach on energy topics of interest, we invite you to a breakfast seminar to discuss electricity procurement. As we complete the final transition to market-based rates, there will be more options for you to purchase your electric supply. At this seminar, we will discuss this important topic and also give you the opportunity to meet competitive electric generation suppliers.

Please join us—June 17, 2010

7:45 a.m.—Breakfast & Networking

8:30 a.m. to 11 a.m.—Seminar

Location—Philadelphia Marriott West

111 Crawford Ave., West Conshohocken, PA 19428

You also will be able to meet and greet with competitive energy suppliers both before and after the program. To learn more or to register, go to https://websafe.kemainc.com/registrationcenter/PECO_Seminar_061710.aspx
